R. R. TUNNEL FROM **BOMB PLOTTERS**

All Bridges Between the Capi-, tal and New York Similarly Protected.

"TO BE ON SAFE SIDE."

Wrecking of Tunnel Would Hamper Shipment North and South of War Supplies.

WASHINGTON, Nov. 23 .- A. M. Keppel, General Superintendent of the Washington Terminal Company, has taken special precautions to protect the great tunnel under Capitol Hill, leading to Washington's \$18,000,000 Union Station, used by all railways entering and leaving the national capital from the South. The guard, composed of trusted men, all armed, will be continued indefinitely. It is re ported that similar precautions have l sen taken at all bridges between Washington and New York.

The tunnel is being guarded against bomb plotters. Mr. Keppel insists the guards have not been stationed in the tunnel because of special information which has reached him, but that he merely wanted to be on the "safe side." He regretted that the fact had become known. He explained that in view of re

ports that attempts would be made to destroy the bridge across the Delaware River, at Trenton, he decided on extra precautions in the tun-

William E. Viett, Chief of the Terminal Police, has been instructed to detail men to guard the tunnels, bridges and viaducts and other property of the company.

Supt. Keppe' insisted that he knew nothing of the report that a letter, supposed to have been written by a Germas sympathizer to railway officials in Baltimore, threatened to destroy the railway station here.

The tunnel is ten city blocks long and skirts the foundations of three important Federal buildings-the Library of Congress, the Senate Office Building and the House Office Building. It passes a block from the Capi-tol itself. While an explosion in the tunn might injure the foundations of these immense buildings, it is be-lieved the guard has been set pri-marily to protect the tunnel and pre-

vent any interruption in communica-tions with the South.

All the railways leading south from Washington send their trains through
